Equivalency Certificate (Approval issued by the competent authority of Canada)

Certificate No.: SU 13441 (Ren. 1)

Template Number: 17

Certification Holder: Canadian Association of Petroleum Producers

Mode of Transport: Road, Marine

Effective Date: May 14, 2024

Expiry Date: June 30, 2029

LEGEND

For the purposes of this equivalency certificate, documents referred to by an abbreviation have the following meaning:

TDG Act: *Transportation of Dangerous Goods Act, 1992*

TDG Regulations: *Transportation of Dangerous Goods Regulations*

NOTES

Note 1: Subsection 31(4) of the *TDG Act* stipulates that any non-compliance with the conditions of this equivalency certificate will result in the provisions of the *TDG Act* and *TDG Regulations* to apply as though this equivalency certificate did not exist.

Note 2: This equivalency certificate provides no regulatory relief other than specifically stated herein. Therefore, all other requirements of the *TDG Act* and the *TDG Regulations* apply.

Note 3: No person shall use or apply this equivalency certificate, including the display of its number, when the equivalency certificate has expired or is otherwise no longer in effect. Any alteration of this equivalency certificate renders it invalid. Visit the Transport Canada website for the latest version of this equivalency certificate.

PURPOSE

(The following is for information purposes only and is not part of the certificate.)

This equivalency certificate authorizes the transportation of a means of containment (i.e. prover) that does not comply with the requirements set out in Part 5, Means of Containment, of the *TDG Regulations*. The means of containment is a volume measurement and calibration device referred to as “provers”, which may contain residual amounts of dangerous goods due to use of the device at fixed locations. The means of containment must be emptied to the maximum extent possible prior to being transported.

No shipping document is required. The placards, the UN numbers, the words “**RESIDUE ONLY**” and the equivalency certificate number are displayed on two opposite sides. The following diagram helps to illustrate the marking requirements.

CONDITIONS

This equivalency certificate authorizes the members of the **Canadian Association of Petroleum Producers (CAPP)** to handle, offer for transport or transport, and authorizes any person to handle or transport on behalf of the members of the **Canadian Association of Petroleum Producers (CAPP)**, by road vehicle, or by vessel in Canada, dangerous goods that are:

- Class 3, Packing Group II or Packing Group III,

in means of containment that does not comply with:

- Part 3 (Documentation) of the *TDG Regulations*,
- Part 4 (Dangerous Goods Safety Marks) of the *TDG Regulations*, and
- Part 5 (Means of Containment) of the *TDG Regulations*,

if the following conditions are met:

1) General

- a) The **Canadian Association of Petroleum Producers (CAPP)** ensures that a paper or electronic copy of this equivalency certificate is provided to all its members;
- b) The consignor of the dangerous goods is a member of the **Canadian Association of Petroleum Producers (CAPP)**;

Note: A current list of members is available on the **Canadian Association of Petroleum Producers (CAPP)** website at <https://www.capp.ca/en/membership/>.

- c) A paper or electronic copy of this equivalency certificate accompanies the dangerous goods during transport and must be provided to an inspector or a peace officer immediately upon request;
- d) The equipment used to heat and circulate production fluids, such as petroleum crude oil, in oilfield applications are excluded from the application of this certificate.

2) Means of Containment

- a) The means of containment:
 - i) is a volume measurement and calibration device (referred to as “provers”), mounted on a highway vehicle for transport to or from work sites for testing of meter equipment accuracy,
 - ii) is not intended for the transportation of dangerous goods and the presence of dangerous goods is due only to the use of the means of containment for the calibration of flow meters,

Equivalency Certificate SU 13441 (Ren. 1)
(Approval issued by the competent authority of Canada)

- iii) is emptied to the maximum extent possible, prior to moving,
 - iv) is designed, constructed, closed, secured, and maintained so that under normal conditions of transport, including handling, there will be no accidental release of dangerous goods that could endanger public safety, and
 - v) when inverted, will not release dangerous goods;
- b) Prior to moving, the means of containment is visually inspected by a trained and qualified person for leaks, corroded or abraded areas, dents, distortions, weld defects, or any other condition that may render the means of containment unsafe for transportation.

3) Marking

- a) The primary class placard and the UN number of the dangerous goods shall be displayed on two opposite sides of the means of containment (i.e. prover) or the means of transport. The placards and UN numbers must comply with the size and orientation requirements from Part 4 of the *TDG Regulations*;
- b) If the means of containment (i.e. prover) is used for more than one dangerous goods included in Class 3, only the UN number of the dangerous goods with the lowest flash point is required to be displayed;
- c) The words **“RESIDUE ONLY”** or **“RÉSIDU SEULEMENT”** are displayed on two opposite sides of the means of containment or the means of transport, next to the primary class and UN number required by condition 3)a) of this equivalency certificate. The words must be displayed in a manner that is easy to identify, legible, and in characters that are at least 32 mm high;
- d) Next to the words required by condition 3)c) of this equivalency certificate, the means of containment (i.e. prover) or the means of transport is marked with the following information in a manner that is easy to identify, legible, and in characters that are at least 32 mm high:

“SU 13441”

4) Training

- a) In addition to the requirements of Part 6 (Training) of the *TDG Regulations*, the members of the **Canadian Association of Petroleum Producers (CAPP)** and any person using this equivalency certificate on behalf of the members of the **Canadian Association of Petroleum Producers (CAPP)** must ensure that the personnel handling, offering for transport or transporting the dangerous goods are knowledgeable of the conditions of this equivalency certificate that relate directly to the person's duties.
